Gentlemen:

Please note that on Tuesday, May 21, 1991, there will be a Risk Assessment Technical Working Group Meeting at Rocky Flats. The meeting is scheduled for the entire day. We will meet at Building 116 at 8:00 a.m. and will spend the morning observing habitats along the Woman Creek drainage. The afternoon session will take place in Room 6 in Building 116 and will start at approximately 1:00 p.m. Topics to be discussed in the afternoon include reference area selection criteria (ecology) and contaminants of concern (ecology and human health).

The morning session will be devoted entirely to ecological issues while the afternoon session will cover both ecological and human health issues. Thus, depending on your lines of responsibility, it may not be necessary to attend the morning session in the Woman Creek Drainage. For those individuals planning to attend the morning session who are not currently on the buffer zone access list (or if you do not know), please call Bruce Thatcher, Jr. of my office before May 17, 1991 at 966-3532 with your name and social security number so that we can update the list.

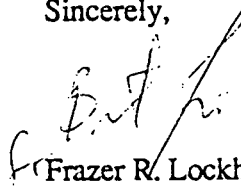

ADMIN RECORD
